Aero India 2025: BIKAR METALS Positions Itself as a Strategic Partner for the Aerospace Industry

From February 13 to 17, 2025, Aero India took place in Bengaluru, India – one of the most significant trade fairs for the aerospace industry. BIKAR METALS seized this opportunity to showcase its latest advancements in aerospace aluminum processing and to drive the company's expansion in India.

A key highlight was the introduction of BIKAR METALS' new production facility in the Belagavi Aerospace Cluster at Aequs SEZ. This state-of-the-art production facility is specifically designed to meet the demanding requirements of the aerospace industry, enabling local production of high-quality aluminium products and other non-ferrous metals for the Indo-Asian market. In addition to aerospace and defence, BIKAR METALS will also serve industries such as automotive, medical technology, electronics, and general engineering from this location.

This strategic expansion offers numerous benefits to BIKAR METALS' Indo-Asian customers: shorter delivery times, more personalized service and enhanced supply security. With this step, BIKAR METALS is responding to the growing demand for reliable materials in aerospace while simultaneously strengthening its global competitiveness.

During the trade fair, BIKAR METALS' international team was on-site to engage with potential partners and customers from around the world. For the Indian team in particular, Aero India was a unique opportunity to present the company's latest developments and the strategic importance of the new production facility in their home country.

Prasad Rajashekharaiiah Siddalinga, Commercial Director India von BIKAR METALS INDIA Ltd. summarized the significance of the trade fair for BIKAR: "Aero India is a key platform for us to strengthen our presence in the Indian aerospace market. The fair allows us to engage with leading industry representatives, to explore new business opportunities and to showcase BIKAR as an expert in advanced materials and precision-cut solutions. This event reinforces our commitment to the growing aerospace industry in India."

About BIKAR METALS

BIKAR METALS is a globally recognised supplier of non-ferrous metals and high-performance materials, with a legacy spanning several decades. Headquartered in Germany, the company specializes in providing aluminium, copper, brass and other materials for industries such as aerospace, automotive, and medical technology. With its emphasis on precision, quality, and customer service, BIKAR METALS has established itself as a trusted partner to leading global companies.
